

Learner Persona: Backend Engineer

Antonio Nunes

Learning Need

AI sys arch
and data
processing
compliance

Requirements
for AI model
transparency,
data handling,
logging

Implement
regulatory
requirements
in code

Time Availability

4
hrs / week

45
mins /
session

3
max weeks

Learning Environment

Primarily at
workstation

Can implement
learnings
directly in their
development
environment

Works in VS
Code and
GitHub

Can go heads
down without
distraction

Learning Preferences

Prefers technical
documentation
style content

Values code
examples and
implementation
guides

Likely to want
hands-on
exercises

May prefer to
dive deep into
one topic at a
time

Current Knowledge

Strong technical AI
implementation
knowledge

Detailed understanding
of system architecture

Very limited regulatory
knowledge

Comfort Levels

Learning
New Tech

Making Time
to Learn

Perceived Value
of Learning
